

SUBJECT: Acquisition of J.McIntyre (Machinery) Ltd. – TARDIS Dross Press Technology

Dear Sir,

As you may be aware, on 22 April 2009 the J.McIntyre (Machinery) Ltd. Company went into administration.

I am writing to inform you that on July 31st 2009 our company ALTEK Europe Ltd. (ALTEK-MDY) successfully acquired the assets of J.McIntyre (Machinery) Ltd., the manufacturer of TARDIS dross presses, from the UK administrator.

I write this letter to inform you of our intentions which are to continue to support the TARDIS dross press brand and the presses located in your facilities and provide continued service, spares and upgrade support as required by you.

The acquisition of the TARDIS dross press brand into the ALTEK-MDY company supports our continued growth strategy to provide support and ongoing development to the aluminium industry in the field of total dross management. Our company has a range of products from the **ALTEK** dross press, **SIBER FORCE** electromagnetic stirrer, skimming machines, Tilt Type Rotary Furnaces, **RHINO CAST** Steel Castings, Consultancy Services and the addition of the TARDIS product and brand brings a wealth of experience and knowledge to 'The Art of Dross Management', our company's focus.

We have recruited key commissioning and service personnel from the old J.McIntyre (Machinery) company and along with the personnel already employed within ALTEK who know very well the TARDIS dross press (Andy Gibbs – former Engineering Manager, Anita Smith – former Contracts Manager etc.), we are set up to provide excellent ongoing technical and administrative support for your existing installations.

If you have had, or are having difficulty in communication with J.McIntyre (Machinery) Ltd. over the past months regarding your dross presses, this has been due to the administration process.

We understand that this process may have meant that your requests for support went unanswered for some time, so I kindly ask you to contact the relevant people I have outlined below in this communication who will do everything they can to support you going forward.

We have also bought as part of the assets an extensive stock and several second hand TARDIS machines that are currently under refurbishment. If you are interested in these or any spares from our stock for your presses please do not hesitate to contact us.

ALTEK-MDY has two operational bases, one in the UK and also one in the US.

Below I outline the key contact personnel for you depending upon your region of operation. These team members are there to support your enquiries and requests.
